THULE RACK GUIDELINES

When using Thule Load carriers and accessories, the user must understand the precautions. The points listed below will assist you in using the rack system and will encourage safety.

- For quality fits and safety, use only the recommended rack or accessory as stated in Thule's current Fit Guide. Do not assume a rack will fit, always check the current Fit Guide when obtaining a new vehicle.
- Unless stated otherwise in these instructions, do not carry more than 75 kg (165 lbs.) on Thule load carriers. Thule load carriers do not increase gutter or roof strength. Thule can not warranty loads that exceed this limit. Total load = cargo weight plus weight of accessories used to carry cargo.
- Always make sure all doors are open when mounting a roof rack system. Make sure all knobs, bolts, screws, straps, and locks are firmly attached, tightened and locked before every trip. Knobs, bolts, screws, straps and locks must be periodically inspected for signs of wear, corrosion, and fatigue. Check your load at stops during the trip to ensure continued fastening security.
- Check local and state laws governing projection of objects beyond the perimeter of a vehicle. Be aware of the width and height of your cargo since low clearance branches, bridges, and parking garages can affect the load. All cargo will affect the vehicle's driving behavior. Never drive with any lock, knob or rack in an open or unlocked position. All long loads such as, but not limited to, sailboards, surfboards, kayaks, canoes, and lumber must be tied down front and rear to the bumpers or tow hooks of the vehicle.
- Remove your Thule rack and accessories when they are not in use and before entering automatic car washes.
- All locks must be turned and moved periodically to ensure smooth operation. Use graphite or dry lubricant to help this. Thule locks are designed to deter vandalism and theft but should not be considered theft proof. Remove valuable gear if your vehicle is unattended for an extended period. Place at least one key in the glove compartment.
- For safety to your vehicle and rack system, obey all posted speed limits and traffic cautions. Adapt your speed to the conditions of the road and the load being carried.
- Do not use Thule load carriers and accessories for purposes other than those for which they were designed. Do not exceed their carrying capacity. Failure to follow these guidelines or the product's instructions will void the warranty.
- All loads must be secured using the provided straps.
- Consult with your Thule dealer if you have any questions regarding the operations and limits of Thule products. Review all instructions and warranty information carefully.
- Not for use on trailers or towed vehicles.
- Not for offroad use.
- Keep bicycle tires away from hot exhaust.

DIRECTIVES POUR SUPPORT THULE

Lorsque vous utilisez les supports et accessoires Thule pour voiture, vous devez observer les précautions suivantes. Les conseils ci-dessous visent à faciliter l'emploi de votre galerie et à l'utiliser en toute sécurité.

- Pour respecter les règles de sécurité et obtenir un ajustement de qualité, utilisez uniquement le produit ou l'accessoire recommandé dans le guide actuel de correspondance de Thule. Ne présumez pas qu'un produit sera adapté; consultez toujours ce guide de correspondance lorsque vous achetez un nouveau véhicule.
- Sauf indication contraire, ne dépassez pas la capacité maximale de 75 kg (165 lb) permise pour les porte charges de Thule. Ne transportez pas plus de 75 kg (165 lb) sur les galeries Thule. Ces dernières ne renforcent pas votre toit ni les points de fixation. Les charges dépassant cette limite ne peuvent pas être garanties. Charge totale = poids du chargement + poids des accessoires utilisés pour le transporter.
- Assurez-vous toujours que les portes de la voiture sont ouvertes lors de l'installation d'une galerie. Avant de prendre la route, assurez-vous que les molettes, les boulons et les vis sont bien serrés, les sangles bien attachées et les dispositifs de verrouillage fermés à clés. Examinez régulièrement ces éléments afin de déceler tout signe d'usure, de corrosion ou de fatigue. Vérifiez votre chargement à tous les arrêts pendant votre voyage pour vous assurer qu'il est bien attaché.
- Vérifiez les lois locales ou provinciales sur le dépassement d'objets sur les côtés d'un véhicule. Soyez conscient de la largeur et de la hauteur de votre chargement pour passer sous les branches basses, les ponts et les plafonds de stationnement couverts. Tout chargement modifie la tenue de route du véhicule. Ne conduisez jamais avec une serrure, une barre ou un écrou ouverts ou non bloqués. Tous les chargements longs, de type surfs, planches à voile, kayaks, canoës, bois, etc. doivent être attachés à l'avant et à l'arrière aux pare-chocs ou aux crochets de remorquage du véhicule.
- Retirez votre galerie et vos accessoires Thule lorsque vous ne les utilisez pas et avant de passer au lave-auto.
- Faites fonctionner régulièrement toutes les serrures afin qu'elles ne se grippent pas. Employez du graphite ou un lubrifiant sec pour conserver leur souplesse. Les antivol Thule sont conçus pour dissuader les voleurs et éviter les actes de vandalisme. Retirez tout matériel de valeur de votre véhicule s'il doit rester sans surveillance pendant une période prolongée. Gardez au moins une clé dans la boîte à gants.
- Pour protéger votre véhicule et votre galerie, respectez les vitesses limites et le code de la route. Adaptez votre vitesse aux conditions de la route et à la charge transportée.
- N'utilisez pas de galerie et d'accessoires Thule à d'autres fins que celles pour lesquelles ils ont été conçus. Ne dépassez pas leur capacité de charge maximale. Le non respect de ces consignes et des instructions spécifiques au produit annulera la garantie.
- Tout chargement doit être attaché en utilisant les sangles fournis.
- Consultez votre revendeur pour toute question sur le fonctionnement et les limites des produits Thule. Lisez attentivement toutes les instructions et les informations de la garantie.
- Ne pas utiliser sur une remorque ou un véhicule remorqué.
- Ne pas utiliser pour la conduite hors route.
- Garder les pneus de vélo éloignés du tuyau d'échappement chaud.

Esté al tanto de la anchura y altura de su carga, ya que las ramas, los puentes, los estacionamientos de baja altura pueden dañar su carga. Toda carga afectará el comportamiento de manejo del vehículo. Nunca conduzca con alguno de los seguros, las perillas o los bastidores abiertos o sin seguro.
