

Important:

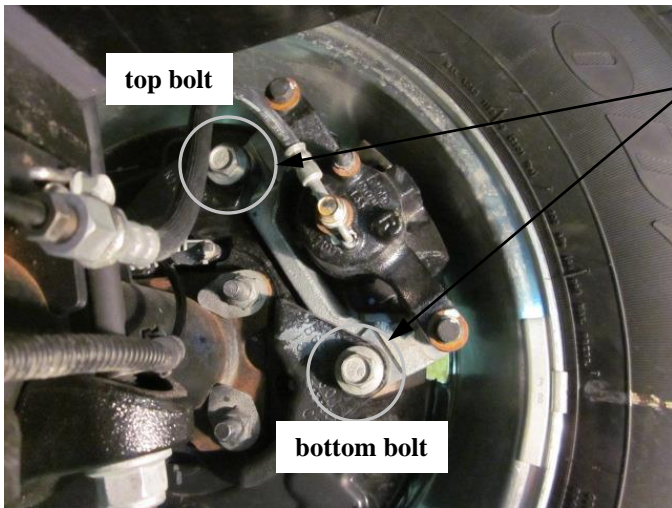

Manufacturer is not responsible for negligent use of vehicle with Brake Cover installed, including over-tightening of screws and bolts causing damage to vehicle or Brake Cover.

INSTALLATION INSTRUCTIONS

Before you install your **PRECISION** Brake Cover, see the Diagram for all necessary parts and bolts.

Stainless Steel Parts

- | | |
|--------------------------------|---------|
| (1) Brake Cover Driver Side | #701499 |
| (1) Brake Cover Passenger Side | #701500 |

OEM Bolts

picture 1

Start on the Passenger Side.

Loosen and remove the bottom bolt. See picture 1.

Place the cover as shown on picture 2. Place the bolt through the tab and loosely secure the bolt. Loosen the top bolt and slide in the open tab between bolt head and brake part.

Bring the cover in position and secure the top and bottom bolt.

picture 2

Repeat for driver's side.

**NOTE: Inspect all bolts, ensure that they are tight!
Inspect occasionally to ensure that they remain tight.**
